RIDE-ON MOWER MAINTENANCE TOOLS - ROBOTIC MOWER GARAGES - GARDENING

GARDEN EQUIPMENT

INNOVATING FRENCH COMPANY
SINCE 2010

"Because gardening has to remain a source of pleasure, discovery and sharing."

Focused on user comfort and safety

For nearly 15 years, GARDEN EQUIPMENT has been designing and marketing a range of products that makes the maintenance of gardens and natural areas easier.

The objective is simple : we want to **offer innovative and quality products** that make life easier and meet the needs of nature professionals as well as private individuals.

The life span and performance of your lawnmower (ride-on or robot) will vary depending on your model, your use, but also and above all on its maintenance.

Reducing our carbon footprint

When you use combustion engine products, you can reduce your environmental impact. As a result of mulching and centrifugal force, grass and leaves accumulate and stick around the cutting deck (especially in the spring when lawns are greasy and wet).

Ideally, the mower should be cleaned after every mowing or at least every other mowing. This is not only to ensure the performance of your lawn tractor, but also to preserve the condition of all mechanical parts. Indeed, the dirt that accumulates **causes premature wear**.

For your robotic mowers, protecting them from the various risks (effects of the sun, hail, balloons...) favors an optimal life span which is also one of the ways to reduce our ecological impact.

Being sustainable also means looking to the future

Always listening to the new needs, Garden Equipment presents a wide choice of design garages to protect your mowing robot. Whatever the size and the brand, our **ROBOT PROTECT** range will protect your equipment.

HYDRAULIC RIDE-ON MOWER LIFTS AND ACCESSORIES

Cleaning and maintenance

The CLIPLIFT helps to simplify the cleaning and the maintenance of your riding lawn mowers. The lateral tilting provides a **safe and easy access** to the mower deck. This model can welcome tractors mowers not exceeding 300 kg / 660 Lb.

THE CUTTING DECK IS ACCESSIBLE BY TILTING IT TO THE SIDE

THE ADJUSTABLE STRAP ALLOWS YOU TO SECURE YOUR MACHINE TO THE CLIPLIFT

WORK IN TOTAL SERENITY THANKS TO THE SAFETY BAR

Double security

It has an active security with an automatic interlocking and a safety support. It allows you to carry out cleaning and maintenance tasks worry free. It comes with an adjustable strap for even more serenity.

Safe and optimized storage

Supplied with hooking support and a safety pin, CLIPLIFT can easily be stored in a garage or a garden shed.

*2 years for individuals and 1 year for professionals

EFFORTLESS
 thanks to its hydraulic system

INGENIOUS
 easy to move and stored

SAFE
 carry free cleaning and maintenance

COMPATIBLE WITH MOST OF RIDE-ON MOWERS, INCLUDING ZERO TURN MODELS

CLIIPLIFT MAGNUM

LÈVE-AUTOPORTÉE HYDRAULIQUE
HYDRAULIC LAWN MOWER LIFT

Cleaning and maintenance

The CLIIPLIFT MAGNUM is the perfect tool for making the maintenance of your lawn mower tractors and zero turn. This model can lift mower riding lawn mowers weighing up to 500 kgs / 1100 lbs (maximum rear wheels track : 127 cm - 50 in).

THE WHEELS ENABLE TO
MOVE IT EASILY

THE SAFETY BAR ENABLE
YOU TO WORK IN
COMPLETE SERENITY

RAMPS ENABLE AN
EVEN EASIER ACCESS
TO THE CRADLE

Double security

An active security feature 3 levels of automatic interlocking, plus a safety support and an adjustable strap. It will allow you to carry out cleaning and maintenance tasks worry free.

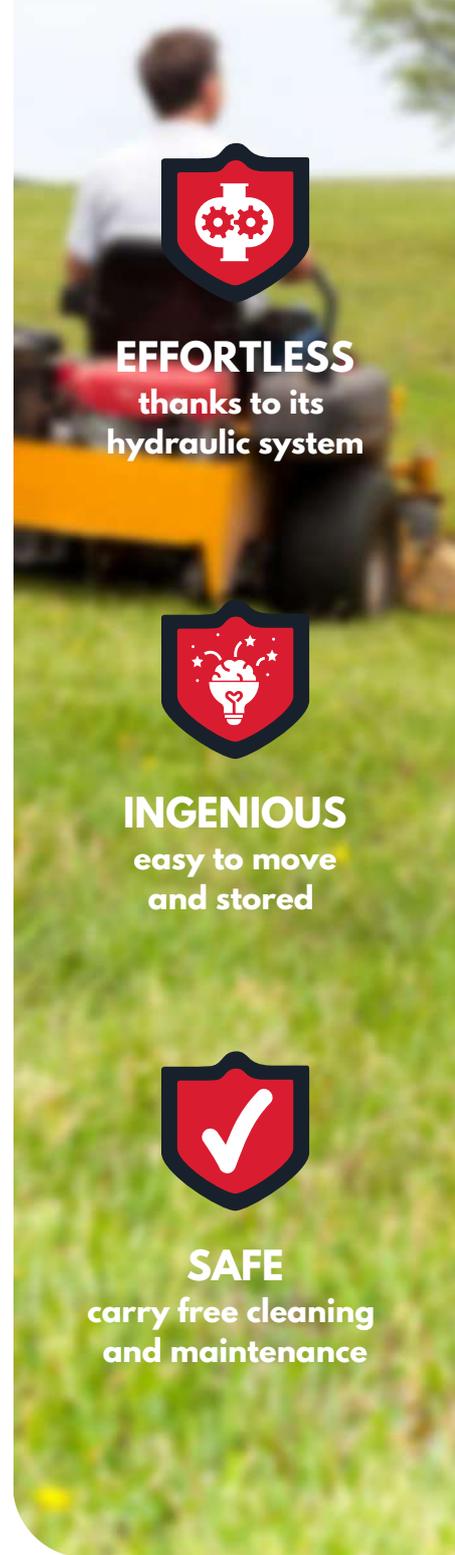

Safe and optimized storage

Handy, CLIPLIFT MAGNUM is easily moving thanks to its handle and large wheels.

Supplied with a hooking support and safety pin, it can easily be stored in a garage or a garden shed.

WARRANTY
2 YEAR

*2 years for individuals and 1 year for professionals

CLIFLIFT PRO
LÈVE-AUTOPORTÉE HYDRAULIQUE
HYDRAULIC LAWN MOWER LIFT

SAFE AND MUCH MORE EFFICIENT !

Gardeners must respect deadlines for the maintenance of green and outdoors areas. Unexpected events happen and require an immediate intervention. Transportable, Cliplift PRO will give you the possibility to **examine the situation** instantly and avoid you to go back to the workshop for checking. You could **directly** remove debris, change the blade...

In the workshops, **mechanics repairers** play an **important** role in the profitability of the company by providing fast and good quality service. Good working conditions (**tools provided and safety during repairs**) increase their efficiency.

THE STRAP ENABLE TO SECURE THE WHEEL BY BLOCKING IT AGAINST THE WHEEL SUPPORT

THANKS TO THE DOUBLE HYDRAULIC JACK PUMP, TILTING IS QUICK AND EFFORTLESS

THE LOCKING PIN THAT LOCKS THE DESCENT ENSURES THAT YOU CAN CLEAN WITH COMPLETE PEACE OF MIND

Double security

The **straps** supplied will secure the tractors front wheels into the Cliplift PRO's brackets. The **locking pin** provides an added safety while you clean the lawnmowers.

Cleaning and maintenance

Cliplift PRO is a revolutionary tool, designed for nature professionals and town halls. It is perfect for blade sharpening / substitution or all other riding lawn mowers maintenance tasks. It can welcome mower tractors weighing up to **800 kgs / 1800 lbs !**

The lifting arm is adjustable, from 115 to 135 cm / 45 to 53 in (outside front wheels measurement).

Convenient and effortless

With the **double hydraulic jack pump**, the lifting is fast and easy. Cliplift PRO can be moved easily thanks to its **4 wheels** and must be used on a stable and flat surface.

EFFORTLESS
 thanks to its
 hydraulic system

INGENIOUS
 easy to move
 and stored

ACCESSORIES

CLIP'NET

Clip'net is the perfect tool to clean the cutting deck of your traditional or ride-on mower, making the task much easier and safer. Its length of 54 cm gives you more comfort when using it.

Specifications

- Patented and made in France
- Easy to use and comfortable
- 25/10 steel scraper
- 10Ø black zinc plating (anti-rust protection)
- Varnished beech wood handle with double grip
- 54 cm / 290 grams

STAINLESS STEEL SCRAPER

This scraper has many uses, it is perfect to clean the cutting deck of a mower, terrace paving stones, weeds...

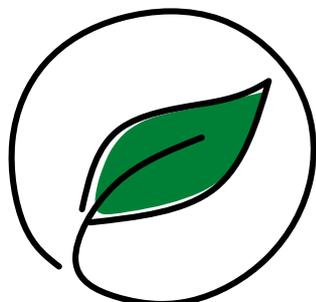

Stainless steel knife 11 cm with beveled shape - Handle : 15 cm

SPARE PARTS

ECO RESPONSIBILITY

In an eco-responsible approach, we offer you the possibility to buy spare parts to repair your device.

Why would you part with a product when a single part can give it a second life?

GARAGES FOR ROBOTIC MOWERS MULTI-BRAND COMPATIBLE

ROBOTPROTECT

WHY IS IT ESSENTIAL TO PROTECT YOUR ROBOTIC LAWNMOWER?

The sun and ultraviolet rays

Robots will be sheltered from sun's ultraviolet rays (and moon). Thanks to their design, the air continues to circulate, favoring good ventilation to prevent stagnation of heat and humidity. If the **battery** is working with a temperature exceeding 30°C, its lifetime will be reduced by 20 %. Robotic mowers **screens are also very sensitive** to the sun and heat.

Protect your equipment against heat will really help to achieve its optimum life expectancy.

The rain and sudden showers

Most of robotic mowers are water resistant. However, electronic circuits dislike humidity even more for an extended period of time. Generally, your robot stays at least **16 hours per day on its charging station** (mostly set for working 4/5 days per week and few hours every day).

The hail, lightnings and falling branches

Many dangers are coming from the sky : **lightning, hail, falling branches, tiles...**

Without Robot Protect, you expose your device against these dangers that could cause significant damages on your robot and its charging station. Resistant and quality, our garages will protect them against those risks or at least reduce damages

Prying eyes and tossed balls

If your robotic mower is outside day and night unattended, it may become an easy target for thieves. Even if recent models are equipped with an anti-theft system, the automatic mower is an outward sign of wealth and as the French proverb says : "Live happily, live hidden"

Your neighbor kids or yours enjoy playing ball games in your garden. Strength and accuracy are not always under control, it may possible that the ball hits severally your equipment, robot or its charging station (and not only once).

Anthracite grey

ROBOTPROTECT C

Robot Protect C is the smallest model of the range. It enables an optimized protection to **small and medium robotic mowers**.

Amazing pieces of technology, a robotic lawn mower needs a garage to **sustainably and effectively** protect them against different weather conditions that could make them **prematurely obsolete**.

TWO OPENING SYSTEMS

THE ROOF

THE FRONT

Multi-brand, it is well adapted to robotic mowers, whether they exit from their charging station in reverse or from the side.

DIMENSIONS

Length x Width x Height : 60 x 43 x 30 cm - 4 kg

Maximum robot height : 25 cm

Below, a non exhaustive list of the compatible models (informative and indicative value not contractual) :

| MARQUES ET MODÈLES / BRANDS AND MODELS | |
|--|---|
| ALKO® | ROBOLINHO E - 500 |
| AMBROGIO® | L15 - L60 - Série Twenty - Zeta R |

LET YOUR IMAGINATION RUN WILD WITH ROBOT PROTECT LIFE

THE GARAGE HAS BEEN DESIGNED SO THAT WATER DRAINS OUTSIDE

A STRENGTHENED STRUCTURE

*This Robot Protect product is compatible with the mentioned brands (trademarks owned by third parties which have not any relation with Garden Equipment and its businesses). They are used for ease of reference to help the customer about the compatibility and the origin of the presented product.

 Grey & Black
 

ROBOTPROTECT *Side*

The Robot Protect Side protects side-charging robots from the effects of exposure to rain and sun (UV protection) to ensure their longevity. A robotic mower must be effectively protected from weather conditions, which affect its lifespan and performance over time.

THE OPENING SYSTEM WILL ALLOW EASY ACCESS TO THE ROBOT AND THE BASE STATION

Its **opening system** allows access to the charging station and to the robot when needed. It is sometimes necessary to access it to carry out various manipulations, or during installation for example.

DIMENSIONS

Length x Width x Height : 60 x 70 x 28 cm - 5 kg
 Maximum robot height : 26 cm

The special feature of the Robot Protect Side is that it has been designed and conceived for robotic mowers that are parked sideways in their base.

Its design and dimensions allow it to be compatible with the majority of the robots of this type* :

| MARQUES ET MODÈLES / BRANDS AND MODELS | |
|--|---|
| ALKO® * | ROBOLINHO E500 - 700 - 1100 - 3100 - 4100 |
| KRESS® * | Mission KR101E - KR110 - KR111 - KR112 - KR113 - KR120E - KR120E - KR121E - KR122E - KR123E |
| WORX® * | Landroid S300 - M500 - M700 - L1000 - L1500 - L2000 |

The 6 anchoring points kit provides a great fixation on the ground, which is essential in strong winds.

Supplied with the manual, the Robot Protect Side is very quick and easy to assemble, regardless of your DIY skills.

*This Robot Protect product is compatible with the mentioned brands (trademarks owned by third parties which have not any relation with Garden Equipment and its businesses). They are used for ease of reference to help the customer about the compatibility and the origin of the presented product.

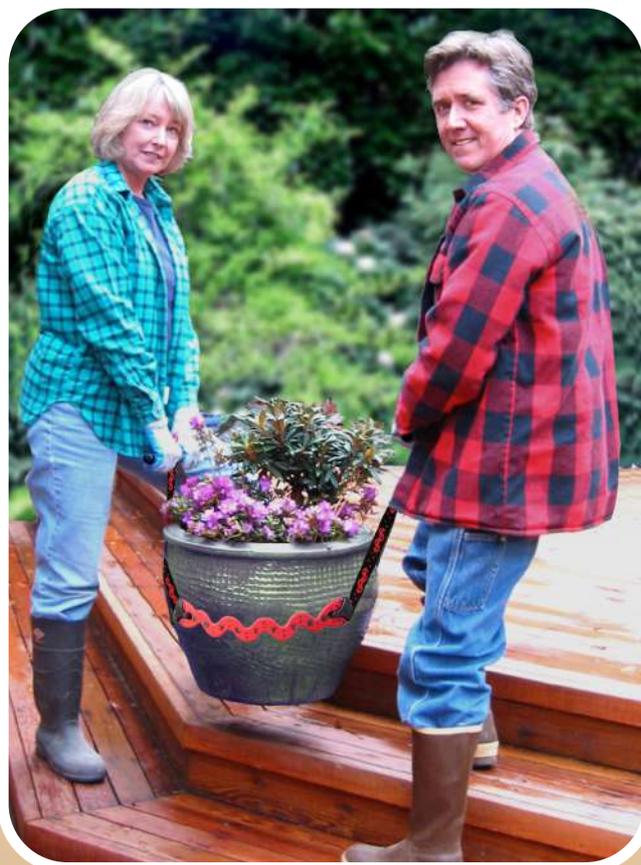

LIFTING STRAPS FOR FLOWERPOTS AND HEAVY OBJECTS

POTLIFTER.

POTLIFTER.

LIFE WARRANTY

Patented lifting straps

Innovative strap system to easily transport heavy and bulky objects.

This product is essential to bring in your plants in winter and to take them out when the sun comes out, to change their place according to your wishes...

PROTECT YOUR BACK !

A smart solution

Did you ever try to move a heavy flowerpots or any bulky objects ?

Everyone knows how it is difficult and risky for your health (back, sprains...).

This innovating system of lifting straps for flowerpots will enable you to move objects **weighing up to 90 kg**, whatever the shape (gaz cylinder, fertilizer bag, wood...) and up to **2 meters in circumference**.

POTLIFTER.

Fast and easy to use

Unclip the hooks and surround the object to be moved at both ends. All you have to do is pull on the handles to tighten the straps. The good balance of the load allows easy and safe movement.

The Potlifter is an ideal gift for yourself, your family and friends who love gardening.

Get your back safe and share the load with Potlifter

- ✓ Fit the shape of the object that you have to move
- ✓ Resistant & durable (load capacity up to 90 kg)
- ✓ Handles 34 cm each side in order to have a good catch in hand
- ✓ Let you move tasks worry free even on a steep ground
- ✓ Easy to set up and use
- ✓ 70 cm in diameter

TRANSPORT ACCESSORIES

BLOCK' MOTO

Our motorcycle and scooter wheel lock is **ideal for secure vertical parking** (in a garage or outside), especially during maintenance tasks on your engine.

It can also be used for **transport** on a classic trailer, a cargo compartment of a motorhome, on the deck of a boat or a lifting table.

Wheel is locked by a tilting caliper, adjustable according to the diameter of the wheel from 13 to 21 inches.

Structure in sheet steel (3mm thick). Black lacquered.
