GARDEN EQUIPMENT

SEASON 2022

CATALOGUE

GARDEN EQUIPMENT

"Because gardening has to remain a source of pleasure, discovery and sharing."

For more than 10 years, GARDEN EQUIPMENT based in France (near Rennes) designs and distributes a range of products that makes easier the garden maintenance.

Our purpose is clear: **offer innovating** and **quality products** that will make your life easier, answering to **individual** and **nature professional expectations**.

The maintenance of your tools should not ruined your enjoying gardening moment. The lifetime and the performances of your mower (tractor or robot) depend not only on its brand or its utilization but also on the proper maintain of your machine.

Comfortable and simple to use, our range of products is the ultimate in riding lawn mowers maintenance tools for **easily lifting lawn tractor** from 300 kg to 800 kg and access the undercarriage (blade sharpening, belt replacement and debris removal...).

Our patented products are compatible with most riding mowers and lawn tractors, including zero turn models.

Always attentive to new needs, Garden Equipment has developed a large choice of **design garages** to **protect** your robotic lawn mowers. Whatever the size or the brand, our **Robot Protect** range will protect your equipment.

Improve your comfort, efficiency and enjoy even more your garden!

GARAGES FOR ROBOTIC LAWN MOWER MULTI-BRAND COMPATIBILITY

**NEW
PRODUCT**

ROBOTPROTECT

MULTI-BRAND

MADE IN EUROPE

RESISTANT

Yes , a garage for the robotic lawn mower is essential !

Sun

Robots will be sheltered from sun's ultraviolet rays (and moon). Thanks to their design, the air continues to circulate, favoring good ventilation to prevent stagnation of heat and humidity. If the battery is working with a temperature exceeding 30°C, lifetime will be reduced by 20 %. Robotic lawn mower **screens** are also very **sensitive to the sun and heat**.

Protect your equipment against heat will really help to **achieve its optimum life expectancy** and even extend it.

Rain and sudden showers

Most of robotic lawn mowers are water resistant. However, electronic circuits dislike humidity even more for an extended period of time. Generally, your robot stays **at least 16 hours per day** on its charging station (mostly set for working 4/5 days per week and few hours every day).

Hail, lightning and falling branches

Many dangers are coming from the sky : **lightning, hail, falling branches, tile...**

Without Robot Protect, you expose your device against these dangers that could cause significant damages on your robot and its charging station. Resistant and quality, our garages will protect them against those risks or at least reduce damages.

Prying eyes and tossed balls

If your robotic mower is outside day and night unattended, it may become an easy target for thieves. Yes, recent models are equipped with an anti-theft system, the automatic mower is an outward sign of wealth and as the French proverb says : *"Live happily live hidden"*

Your neighbor kids or yours enjoy playing ball games in your garden. Strength and accuracy are not always under control, it may possible that the ball hits severely your equipment, robot or its charging station (and not only once).

ROBOT PROTECT C

Anthracite grey

Robot Protect C is the smallest model of the range. It enables an optimized protection to **small and medium robotic mowers**.

Amazing pieces of technology, a robotic lawn mower needs a garage to **sustainably and effectively** protect them against different weather conditions that could make them **prematurely obsolete**.

Opening roof system

Easy access to the station

Multi-brand, it is adapted for lateral outlets as well as back up from the base station.

Specifications

Inox base, composite material covered by aluminium sheet

Robot maximum height : 25 cm

Length x Width x Height :
60 x 43 x 30 cm -- 4 kg

The 4 anchoring points of the Robot Protect C ensure a secure fastening on the ground. It is supplied with a mounting kit and a manual to allow a quick and easy installation.

LIFTING STRAPS FOR FLOWERPOTS AND HEAVY OBJECTS

 **POTLIFTER.**

EASY

INNOVATING

PATENTED

POTLIFTER.

How to move a heavy flowerpot ?

LIFE
WARRANTY

Patented lifting straps system

Potlifter is an innovating lifting straps system to **easily move** heavy and bulky flowerpots or various objects.

This product is an essential to bring your plants home on **winter**, take them out for **sunny days** and to move them as you wish all year long.

A smart solution

Did you ever try to move a heavy flowerpots or any bulky objects ?

Everyone knows how it is difficult and risky for your health (back, sprains...).

This **innovating system** of lifting straps for flowerpots will enable you to move objects weighing up to 90 kg, whatever the shape (**gaz cylinder, fertilizer bag, wood...**) and up to 2 meters in circumference.

POTLIFTER.

Fast and easy to use

Unclip the hooks and surround the object to be moved at both ends. All you have to do is pull on the handles to tighten the straps. The good balance of the load allows easy and safe movement.

The Potlifter is an ideal gift for yourself, your family and friends who love gardening.

Get your back safe and share the load with Potlifter

- ✓ Fit the shape of the object that you have to move
- ✓ Resistant & durable (load capacity up to 90 kg)
- ✓ Handles 34 cm each side in order to have a good catch in hand
- ✓ Let you move tasks worry free even on a steep ground
- ✓ Easy to set up and use
- ✓ 70 cm in diameter
